## LANGUAGE/PROGRAMMING AND OTHER SKILLS

Java, Python, C#, JavaScript, HTML, CSS

MySQL, MongoDB, Git, Docker, Linux

## FRAMEWORKS

Spring boot, React JS, Vue js

## PROJECTS

### School Management system (04/2025 - 07/2025)

- Developed a role-based School Management System using Spring Boot and Thymeleaf, enabling secure registration, authentication, and dashboard access for Admins, Instructors, Students, and Parents. Implemented customized user roles, entity management, and dynamic content rendering based on user permissions.

### Hotel Management System (03/2021 - 06/2021)

- A collaborative hotel management application developed during my studies. Includes user registration, room booking, cancel bookings and rooms etc. This is a desktop application built using JavaFX, Java and MySQL database.

### Stuff Lending System (Console-Based Java Application) (08/2024 - 09/2024)

A Java-based console application designed to facilitate peer-to-peer item lending. The system allows users to lend out personal belongings in exchange for credits, which can then be used to borrow items from others. It efficiently tracks item availability and borrowing history, ensuring transparency and accountability within the community.

### Digital Portfolio (06/2025 - 08/2025)

Built a personal portfolio website using modern technologies including Next.js, React, TypeScript, and Tailwind CSS. Integrated reusable UI components with shadcn/ui, implemented theme switching with next-themes, and maintained a clean, responsive design.

## CERTIFICATES

Spring Boot 3, Spring 6, Spring Core, Spring Rest, Spring MVC, Spring Security, JPA, Hibernate

## LANGUAGES

Swedish and English

Full Professional Proficiency
